Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the static or mechanical mixer, carbon dioxide pressure control and supply of claim 1, and the second cold water supply line of claim 2, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is claimed a mixing faucet and method, but there are no method steps recited in claim 1.

Additionally, the static or mechanical mixer and CO₂ pressure control and supply are merely inferentially claimed and not positively recited elements of the invention. The only positively recited elements of the invention are the water faucet and cold water supply line. Applicant in claim 1 recites that the faucet and cold water supply are

"connectable" to the mixer, carbon dioxide pressure control and supply, but never positively recites states that these elements are part of the invention.

There is not antecedent basis for the faucet valve recited in claim 2.

The second paragraph of 35 USC 112 requires a claim to particularly point out and distinctly claim the subject matter which applicant regards as his/her invention. Under *In re Hammack*, 166 USPQ 204 and *In re Moore*, 169 USPQ 236, claims must be analyzed to determine their metes and bounds so that it is clear from the claim language what subject matter the claims encompass. This analysis must be performed in light of the applicable prior art and the disclosure. The definiteness of the claim is important to allow others who wish to enter the market place to ascertain the boundaries of protection that are provided by the claim.

As it has been held that it is "improper" to rely on what are at best speculative assumptions as to the meaning of a claim and then base a rejection under 35 USC 103 thereon, no such rejection has been made. However, the lack of such a rejection should not be construed as meaning that the claims as presently drawn would be patentable if corrected.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Levings is cited for its disclosure of the state of the art.
